

SRHMRA Submission 13 — Academic Unit of General Practice, Australian National University Medical School (Prof Marjan Kljakovic)

This article feeds into the question asked in this review: "What are the health and medical research strategic directions and priorities and how might we meet them?"

The article points out that Australia needs to develop a culture of research that allows research to flourish in general practice. A research culture will be evident in Australian general practice only when clinician-researchers are paid to practice and conduct research in their general practices.
